#### Catalog Symbol: KRP-C-SP

Time-Delay – 4 seconds (minimum) at 500% rated current Current-Limiting

Ampere Rating: 601 to 2000 Amperes‡ Voltage Rating: 600 Volts AC (or less) 300 Volts DC (or less) Interrupting Rating: 300,000A RMS Sym. (UL) Interrupting Rating: 100,000A DC (UL) Agency Approvals:

UL Listed – Special Purpose<sup>£,</sup> Guide JFHR, File E56412 CSA Certified – (200,000 AIR), Class 1422-02, File 53787 Class L per CSA C22.2, No. 248.10

01233 E PEI 00A 022.2, 110. 240.10

‡Use KRP-CL for current ratings below 601 amps. \*601-3000A is rated 340 VDC and 50 KAIC.

£Meets all performance requirements of UL Standard 248-10 for Class L fuses.

\*\*Weight per carton.

†Special purpose rating of 300,000 AIR.

#### **General Information:**

- All-purpose silver-linked fuse for both overload and shortcircuit protection for high capacity systems (mains and large feeders).
- Time-delay (minimum of four seconds at five times amp rating) for close sizing.
- Current-limiting action of the fuse generally affords considerable reduction in bus bracing.
- Interrupting rating of 300,000 amperes complies with NEC Sections 110-9 and 230-65 for today's large capacity systems.
- O-ring seals maximize pressure build-up during currentlimiting action and ensure filler retention.
- High grade silica-sand filler; accelerates response of fuse to short-circuits by having quenching effect upon the fuse arc.
- 99.9% pure silver fuselinks. The high conductivity of silver gives low watt loss and low operating temperature at normal current levels; maximizes total clearing l<sup>2</sup>t fault energy let-through.
- Selective coordination (blackout prevention).
- Glass melamine tube.
- Silver-plated end bells.

CE OE logo denotes compliance with European Union Low Voltage Directive (50-1000 VAC, 75-1500 VDC). Refer to BIF document #8002 or contact Bussmann Application Engineering at 636-527-1270 for more information.
